1. About this Release Version

1.1.General

This release version is 1.11.

Applicable model: CBK-RPU7

1.2.Software version upgrade procedure

For how to upgrade the unit software to this version, refer update guide.

2. New Features

There are no updates.

3. UI improvement

There are no updates.

4. Others

4-1. Enhanced resistance to frequent CRC errors

Enhanced resistance to frequent CRC errors that may occur due to reasons such as incorrect SDI cable connections.

5. Bug fixes

There are no updates.

6. Tips

6.1. How to handle persistent Freeze Video messages

When streaming with the return function enabled, if you continuously see Freeze Video messages, it's possible that the return has stopped due to a USB cable connection issue.

If Freeze Video messages persist, please turn off the power to this device, check the USB cable connection, then turn the power back on to resume operation.
