

AXS-R5 Firmware Version V4.1 release note

August 8th, 2014

This document explains about firmware update of AXS-R5 V4.0 to V4.1. The latest firmware version of related products is below. PMW-F55/F5 must be updated to V4.1.1 or V4.1.0 at the same time. For details about PMW-F55/F5 V4.1.1, please refer to “PMW-F55/F5 Firmware Version V4.1.1 release note”.

| Product name | Latest firmware | Release date |
|----------------------|-----------------|-------------------------------|
| PMW-F55/F5 | V4.11 | August 8 th , 2014 |
| AXS-R5 | V4.1 | This announcement |
| AXS-512S24 | V1.2 | June 5 th , 2013 |
| AXS Utility Software | V1.3 | Feb 28 th 2014 |
| RAW Viewer | V2.2 | Feb, 28 th , 2014 |

Attention: You must update R5 to V4.1 from V4.0, V3.0, V2.0, V1.21 and V1.20. If your R5 is not yet, please update to V1.20 first and go to this updating.

<<Modification from V4.0 to V4.1>>

<Functional Improvement>

1. Support of new AXS-A256S24 memory card

The new firmware will enable the support of the new 256GB AXS-A256S24 memory card.

Attention: The new smaller AXS-A memory cards are only compatible with the AXS-R5 (RAW recorder) and the AXS-CR1 (Card reader) by using the new appropriate card adapter.

2. Enhancement of Metadata

The new S-Log3/S-Gamut3.Cine & S-Log3/S-Gamut3 settings will be written into the Metadata XML files.
